Tokenomics (Ekonomi Token)	06
Token Use Cases	07
Roadmap	08
Cover	09

Introduction

In the aviation world, Pitot and Static Systems are vital instruments for measuring the airspeed, altitude, and vertical speed of an aircraft. Without this data, pilots would have difficulty maintaining the direction, speed, and safety of the flight. This is the philosophy we have adapted to the blockchain world: combining speed, accuracy, and stability to create a sophisticated and reliable crypto ecosystem.

Vision and mission

Vision

Presenting a fast, stable and continuously evolving digital financial system, inspired by the working principles of the aviation system.

Mission

Provides fast and efficient crypto transactions

Ensuring system security and scalability

Supporting the growth of a sustainable innovation-based ecosystem

Philosophy Technology

- Airspeed (Transaction Speed)

Like the Pitot system that measures airspeed, our platform relies on cutting-edge blockchain technology to process transactions in seconds, reducing latency and increasing efficiency.

- Altitude (Security & Scalability)

Just as altimeters keep aircraft safe, our systems are designed with high-level security protocols and an architecture that supports long-term scalability.

- Vertical Speed (Ecosystem Growth)

With a clear roadmap and an innovative team, we ensure the growth of the ecosystem through collaboration, DeFi integration, NFTs, and other Web3 features.

Tokenomics (Ekonomi Token)

Nama Token : PITOT & STATIC SYSTEM

TICKER : P&S

Total Supply : 1.000.000.000 PITOT

Distribusi:

- 30% Ecosystem & Project Development
- 20% Team & Consultants
- 25% Community & Airdrop
- 15% Liquidity & Listing
- 10% Strategic Reserves

Token Use Cases

- Transaction fees on the network
- Access to premium platform features
- Staking to get rewards
- Voting in project governance
- Community participation incentives

Roadmap

Q1 2025

PITOT & STATIC SYSTEM
(\$P&S) token launch

Q2 2025

Listing on DEX/CEX

Q3 2025

Development of whitepaper,
website and smart contract

Q1 2026

Strategic collaboration,
NFT & Web3 expansion

Q2 2026

Global expansion, mobile
ecosystem launch

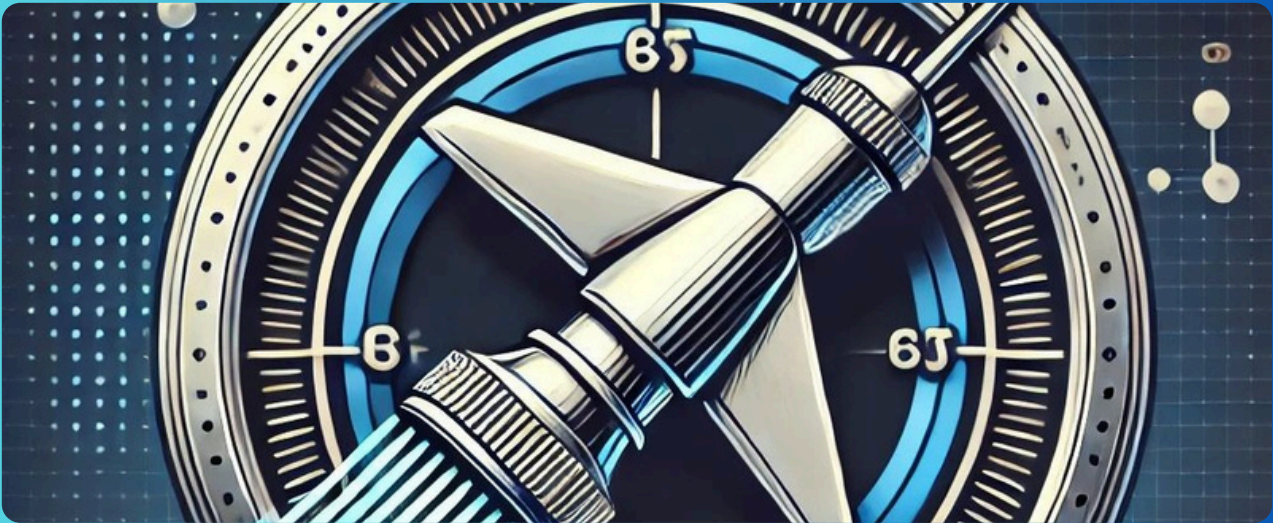

conclusion

By adopting the principles of accuracy and efficiency from aviation systems, PITOT & STATIC SYSTEM brings transparency, speed, and security to the crypto world. We invite you to fly with us in a smart and innovative digital financial revolution. 🚀
